

API Documentation for Service Endpoints

API Documentation for Service Endpoints

This document provides detailed information about the two service-related API endpoints for retrieving lists of medical services from the PricelessMed platform.

1 Basic Service List Endpoint

Endpoint

GET /api/service/lists

Description

Retrieves a paginated list of medical services with optional search filtering.

Query Parameters

Parameter	Type	Required	Description	Default	Example
pageNo	Integer	No	Page number for pagination	1	3
pageLimit	Integer	No	Number of records per page	10	10
search	String	No	Search term to filter services by name	None	den

Example Request

GET https://pricelessmed.com/api/service/lists?pageNo=3&pageLimit=10&search=den

Response

- **Status:** 200 OK
- **Content-Type:** application/json
- **Body:** JSON array of service objects (structure depends on the API response; typically includes service ID, name, and other metadata).

Example Response

```
{
  "status": "success",
  "data": [
    {
      "id": 123,
      "name": "Dental Checkup",
      "description": "Routine dental examination"
    },
    // Additional service objects
  ],
  "pagination": {
    "pageNo": 3,
    "pageLimit": 10,
    "totalRecords": 50
  }
}
```

2 Advanced Service List Endpoint

Endpoint

GET /api/service/list

Description

Retrieves a paginated list of medical services with advanced filtering options, including location, category, discounts, and more.

Query Parameters

Parameter	Type	Required	Description	Default	Example
pageNo	Integer	No	Page number for pagination	1	1
pageLimit	Integer	No	Number of records per page	10	25
location	String	No	Location filter for services	None	
categoryId	String	No	Filter by service category ID	None	
search	String	No	Search term to filter services by name	None	Dental
facility	String	No	Filter by facility name or ID	None	

Parameter	Type	Required	Description	Default	Example
practitionerGender	String	No	Filter by practitioner's gender	None	
practitionerLanguage	String	No	Filter by practitioner's language	None	
subcategoryId	String	No	Filter by subcategory ID	None	
subSubCategoryId	String	No	Filter by sub-subcategory ID	None	
minDiscount	Float	No	Minimum discount percentage	None	
maxDiscount	Float	No	Maximum discount percentage	None	
type	String	No	Filter by service type	None	
sortBy	String	No	Field to sort results by (e.g., name, price)	None	
long	Float	No	Longitude for location-based filtering	None	29.96
lat	Float	No	Latitude for location-based filtering	None	31.22

Example Request

GET <https://pricelessmed.com/api/service/list?pageNo=1&pageLimit=25&location=29.96,31.22>

Response

- **Status:** 200 OK
- **Content-Type:** application/json
- **Body:** JSON array of service objects with additional metadata based on filters.

Example Response

```
{
  "status": "success",
  "data": [
    {
      "id": 456,
      "name": "Dental Implant & Crown",
      "category": "Dental",
      "location": {
        "latitude": 31.2257484,
        "longitude": 29.9638089
      },
      "discount": 15.0
    }
  ]
}
```

```
    },  
    // Additional service objects  
  ],  
  "pagination": {  
    "pageNo": 1,  
    "pageLimit": 25,  
    "totalRecords": 100  
  }  
}
```

Notes

- Both endpoints require proper authentication (if applicable, e.g., API key or token).
- Ensure URL parameters are properly encoded, especially for search terms containing special characters (e.g., Dental+Implant+%26+Crown).
- The response structure may vary based on the API implementation; refer to the API provider's documentation for exact field details.
- For location-based filtering, both long and lat must be provided together to ensure accurate results.
